

about the seal for the University
of Wales, I find that the
Prince of Wales will be
installed as Chancellor about
the 20th of June, & he will
have to seal the Charter.
Could an impression be made
of the Wax seal in some
metal, which could be
used on the occasion, for
the die which will be
used afterwards will
take

many a day to make. I
suppose.

a Master matrix could
be made of the wax - &
a metal one afterwards
probably, which could
be used meantime -

Will you kindly tell me.

Very truly

Wm Jones
